

FAIR WARNING – NOTICE OF EXEMPTION FROM ANY AND ALL VACCINES

To all administrators, teachers, medical staff, and legal department of:

\_\_\_\_\_ School:

This is to inform all parties that we are exempting our child \_\_\_\_\_ from all vaccines. At the present time AB2109 remains in effect in California until SB277 is adjudicated in the courts. There are currently no laws in this state requiring absolute mandatory vaccination(s).

We are aware that some schools are illegally representing SB277 as now in force and using this in error to force vaccinations on children. AB2109 is still the law in California, and as such guarantees personal beliefs exemptions.

Our child is not to receive any vaccines at any time, on school grounds or anywhere else.

If these express instructions are violated at any time, this is fair warning that we will use every available resource to prosecute the perpetrators for physical assault, as well as Bill of Rights violations and any other charges our attorney might deem applicable, to the fullest extent.

Furthermore we are not to be harassed, insulted, assaulted, or intimidated for our personal choice of medical treatment. We have thoroughly informed ourselves about the issue and will not give way. We will not discuss it, debate it, or be questioned by anyone. Any violation of this specific instruction will be vigorously defended. There are laws that must be followed by everyone concerned; any transgressions will be duly prosecuted to the full extent.

As with all medical records, we expect this exemption to be kept strictly confidential from any personnel or parties. There are specified penalties for such HIPAA violations.
